DETAILED ACTION

Claims 1-4, 7-10, 12-14, and 16-18 are allowed.

Reason's For Allowance

The following is an examiner's statement of reasons for allowance: The prior art fails to teach either singly or in combination a contact-type image sensor module having a transparent element supported by the housing and provided on an area through which the reflected light passes with infrared light shielding extending to a width of 0.1mm through 0.4mm in a direction orthogonal to that in which the document travels regarding claims (1, 9); a document guide having a slit in the proximity of a reading position is configured to pass the reflected light, and the document guide is configured to fix the transparent element regarding claims (3, 17, 18); a document guide supported by the housing and configured to draw near or come into contact with the document, and configured to detach the transparent element from the housing when the light-receiving part receives the reflected light including the infrared light regarding claim (7); and optical axes of two contact-type image sensor modules placed opposite to each other are made to coincide, the housing of the contact-type sensor modules are fixed to each other with a single metallic part, and both faces of the document are read out with the document being conveyed into a gap between the opposing document guides regarding claims (10, 12).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
